

WORK CLOTHING ZIPPER

工装系列拉链

WORK CLOTHING ZIPPER

工装系列拉链

我司**防静电拉链**已更换材质，采用碳纤维作为导电材料，替代了传统的金属丝材质，提高防静电性能。

The anti-static zipper has been used carbon fiber as a conductive material, replacing the traditional metal wire material to improve its anti-static performance.

注意：

此种防静电的原理是把因摩擦等情况产生的静电导走，避免静电产生积累。并非不产生静电。另外，导电的碳黑是黑色的，用于黑色布带上会不容易看出来，但用于需染色的其它非黑色布带上，会看到黑线，颜色越浅越明显。

Attention:

The principle of this anti-static method is to guide away the static electricity generated by friction and other conditions to avoid the accumulation of static electricity. It is not without generating static electricity. In addition, conductive carbon black is black, which may not be easily visible when used on black tapes, but when used on other nonblack tapes that require dyeing, black lines will be visible, and the lighter the color, the more obvious it will be.

防火拉链布带采用芳纶防火纤维，具有高强度、耐高温等性能。拉链长时间放置和水洗不影响码带本身的防火效果。

The tape is made of aramid fireproof fiber, which has high strength, high temperature resistance, and other properties. Prolonged placement and washing of the zipper do not affect the fireproof effect of the chain itself. 树脂防火拉链米齿采用防火POM以及防火塑料拉头;金属防火拉链采用金属牙以及金属拉头。

Resin flame resistant zippers are made of fire-resistant POM teeth and fire-resistant plastic sliders. Metal flame resistant zippers are made of metal teeth and metal sliders.

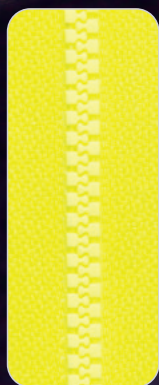

这系列拉链将在特殊领域提供永久保护。

This series of zippers will give you permanent protection applied in special fields.
